

INSTALLATION DO LIST

- ☀ Blend tiles amongst all pallets before taking to the roof.
- ☀ Bend every tile in a downward motion before nailing.
- ☀ Always gap tiles $\frac{3}{8}$ inch.
- ☀ Hip and Ridge must always be at 6-inch exposure.
- ☀ Always use the "Nail Here" markers.
- ☀ The entire roof assembly **MUST** be EcoStar products for a Gold StarWarranty.
- ☀ Use only Class A tiles and VersaShield® for Class A Fire Rated System.

INSTALLATION DON'T LIST

-  **Do Not** nail the tile while holding your hand behind the tile. This will cause the tile to kick up!
-  **Do Not** overdrive nails. Watch for dimples because that means you have overdriven the nails.
-  **Do Not** exceed exposure requirements for various slopes.
-  **Do Not** use red chalk.
-  **Do Not** install if tile temperature is below 45° F
