endless possibilities.

beautiful. durable. sustainable. hygienic.

Marmoleum's Environmental Impact

Marmoleum Modular is currently the only floor tile that is USDA Bio-Preferred Certified 100% biobased. Made from natural, renewable ingredients, Marmoleum Modular features inherent antimicrobial and antistatic properties that improve indoor air quality and resist bacteria growth without chemical additives. Marmoleum Modular's sustainable, water-based Topshield 2 finish provides occupancy-ready installation and exceptional performance against real world flooring damage, including soiling, staining, scratching and scuffing. While non-renewable floor coverings may be permanently damaged, your beautiful Marmoleum Modular floor can easily and cost-effectively be renewed, bringing it back to its original beauty, even after years of heavy use. In fact, Marmoleum Modular has a system service life of 30 years.

Marmoleum Modular provides a beautiful, durable, sustainable, and hygienic flooring solution for healthcare, education, government, corporate, and retail facilities.

3 coordinated sizes.

10" x 10" approx.
(25 cm x 25 cm)

10" x 20" approx.
(25 cm x 50 cm)

20" x 20" approx.
(50 cm x 50 cm)

Marmoleum Modular, a naturally sustainable tile collection comprised of 44 beautiful colors and 3 coordinated sizes designed to mix and match for endless design possibilities. Available in 10"x10", 20"x20" and unique 10"x20" rectangular tiles, Marmoleum Modular makes it easy to create inspiring designs ranging from timeless chevron, herringbone, and checkerboard patterns to modern mosaics
