SHADE SHAPE  
STRUCTURE  
STRIPES

THIS NEW MARMOLEUM COLLECTION FROM FORBO PRESENTS  
ITSELF IN FOUR INDIVIDUAL EXPRESSIONS:

**Shade:** a collection of concrete structures in cool and warm greys as well as black and white. They are designed to combine amongst each other and the color range is presented in delicate steps of color intensity and hues to create natural realistic stone and concrete patterns.

**Shape:** Different sizes create intricate designs to create stunning patterns.

**Structure:** classic and contemporary marbled and streaked colors that have been created to mix and match to give a special dimension to your floor plan.

**Stripes:** create movement with Marmoleum Modular Striato, a collection of 15 harmonized linear designs available in both planks and tiles. The collection colors were carefully selected to optimize design possibilities and bring a modern dimension to traditional “wood look” floors.

Besides combining within the themes, you can of course also combine each and every color and design with each other.

## FROM THE INDOOR ENVIRONMENT TO THE NATURAL ENVIRONMENT, MARMOLEUM® HELPS CREATE BETTER ENVIRONMENTS.

Made from natural, renewable ingredients, Marmoleum sheet and tile products are USDA Certified 100% biobased and features naturally inherent antimicrobial and antistatic properties.

Marmoleum's sustainable, water-based Topshield 2 finish provides occupancy-ready installation and exceptional performance against real world flooring damage, including soiling, staining, scratching and scuffing. While non-renewable floor coverings may be permanently damaged, Marmoleum can easily and cost-effectively be renewed, bringing the floor covering back to its original beauty, even after years of heavy use. In fact, Marmoleum has a system service life of 30 years.
