

ECOS UNIVERSAL PRIMER APPLICATION INSTRUCTIONS

Recommended For	Use on almost any surface. Very effective at covering difficult stains. This is the preferred primer for metals.
Coverage	400 sq. ft. per gallon 100 sq. ft. per quart; 1 coat recommended
Description	Universal Primer is a strong bonding primer for use on most surfaces. It is also effective at covering stains. This is the preferred Primer for bare metals. This product will not block oily/tarry stains, such as asphalt, or those from coal fires. Not suitable for exterior bare cast iron.
Preparation	Surfaces should be clean, dry, sound, and free from dirt, dust, grease, and loose or flaking material. Clean stubborn areas with mild detergent. Rinse and dry thoroughly before painting. Soft or crumbly substrates should be pre-treated.
Application and Clean Up	Under most conditions thinning is not necessary. Stir gently before and during use. Intermix if using multiple containers to ensure color uniformity. Generally only requires one coat. Sand lightly between coats as this product may raise the grain of the wood. Normally dries to the touch in one hour. Allow twenty four hours before sanding or painting. Can be applied using a good quality synthetic brush; or rolled using a shed resistant 1/4"-3/8" roller cover. Avoid applying below 50°F (10°C).
